

Our Ref. LEPROFILE-UNI/2023/005

June 5, 2022

Dear Sir/Madam,

**LETTER OF SUPPORT FOR PARTNERSHIP AND COLLABORATION ON THE
DEVELOPMENT AND COMMERCIALIZATION OF MACHINE LEARNING BASED
VOICE DISORDER DETECTOR SYSTEM**

I hope this letter finds you in good health and high spirits. I am writing to express my enthusiasm and support for the partnership and collaboration between our organizations in the development of a “*Machine Learning (ML) - based Voice Disorder Detector System*”. As an expert in the development of AI and ML systems and a firm believer in the potential of technology to improve healthcare outcomes, I am confident that this endeavor holds great promise.

Our organization, has extensive experience in developing advance software systems such as education, games, medical, asset supply chain management and others. We have consistently demonstrated our commitment to advancing the frontiers of technology and its applications in the healthcare industry. It is with this background and experience that I express my strong interest in collaborating with your esteemed organization on this innovative project.

The proposed machine learning-based voice disorder detector system aligns perfectly with our shared vision of improving healthcare by harnessing the power of cutting-edge technologies. By combining our collective expertise, resources, and networks, I firmly believe that we can overcome the challenges associated with voice disorder detection and pave the way for efficient and non-invasive diagnostic tools.

In a world where voice disorders often go undiagnosed or are misdiagnosed due to limitations in current assessment methods, the development of a reliable, machine learning-based solution has the potential to revolutionize the field. The integration of advanced machine learning algorithms with comprehensive voice analysis techniques will empower healthcare professionals to detect and monitor voice disorders with unprecedented precision and objectivity. This, in turn, will enable early interventions and personalized treatment plans, ultimately enhancing the quality of life for individuals affected by these conditions.

To ensure the success of our collaboration, we propose a mutually beneficial partnership model. Our organizations can pool resources, share knowledge and expertise, and jointly pursue funding opportunities to support research and development efforts. By collaborating closely throughout the entire project lifecycle, we can maximize the efficiency of our collective efforts and ensure that the resulting voice disorder detector system meets the highest standards of accuracy, reliability, and usability.

In addition to the technical aspects, we also recognize the importance of intellectual property protection and commercialization strategies. We are committed to working together to establish clear guidelines and frameworks for the ownership and management of intellectual property generated during the course of our collaboration. Moreover, we are keen on exploring potential commercialization opportunities and bringing this innovative product to market, thereby extending its impact and making it accessible to a wider audience.

I am excited about the prospect of partnering with your organization on the development of this game-changing machine learning-based voice disorder detector system. By combining our respective strengths and expertise, we can make significant strides in improving the diagnosis and treatment of voice disorders, ultimately benefitting countless individuals worldwide.

Please consider this letter as a formal expression of our intent to collaborate and commercialize this product. I kindly request a meeting at your earliest convenience to discuss the details further and explore the next steps in realizing this shared vision. I am confident that together we can make a lasting and positive impact on the field of voice analysis and healthcare.

Thank you for your attention to this matter. I eagerly await your response and the opportunity to embark on this exciting journey of collaboration.

Thank You.
